

Dashboards Quick Start Package

Dashboards Quick Start Package

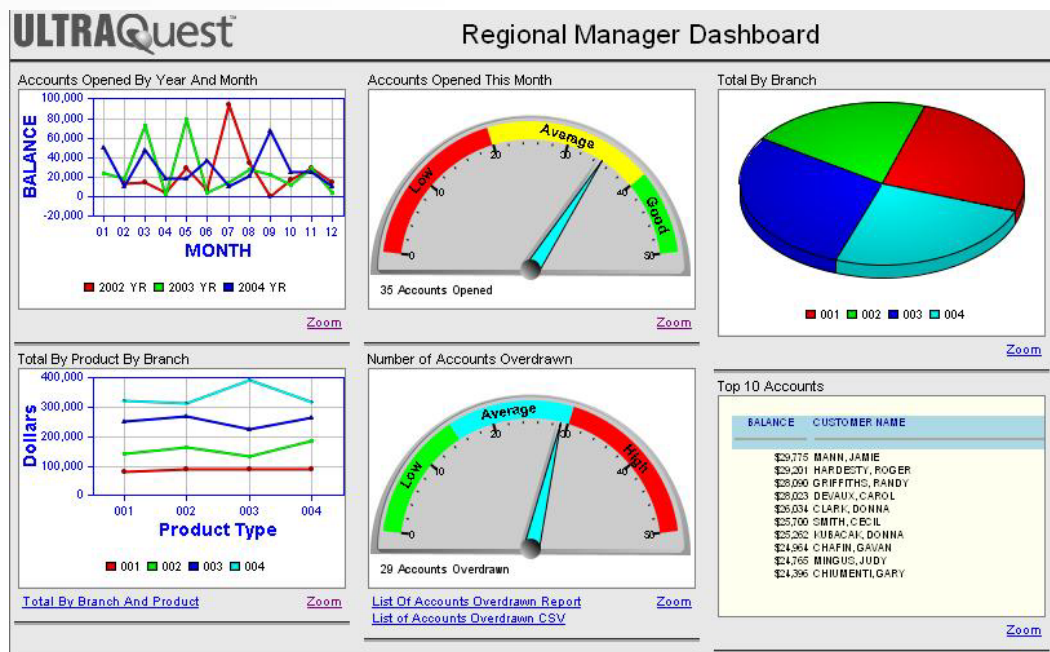

This *FAST START* package contains the software and services required for Select Business Solutions to implement UltraQuest dashboards based upon the customer's data. This package includes:

- License of WebCharts3D charting software
- 3 days of Select consulting for the implementation of UltraQuest Dashboards at customer's site
- Package Fee: \$8,300 plus T&E

Overview:

The Select consultant will work with the customer to understand their data in order to design and create charts and reports that will become components of the customized Dashboards. Once the UltraQuest dashboards have been developed from within the UltraQuest Reporter environment, they then can be published and accessed through the UltraQuest Library. Other users can reference these dashboards directly through a URL.

UltraQuest Dashboards provide an "at-a-glance" view of business information across the organization. They are typically generated for management who require a high level view of business performance, and prefer timely, visual snapshots of both operational and strategic data. Charts within the dashboard can be created in a number of formats, including pie charts, gauges, line plots and bar charts, as shown in the sample below.

To obtain more information, please contact Select Business Solutions at www.selectbs.com or 1-888-472-7347.
